Poonamchand Gupta Vocational College
2023 – 2026 | Khandwa, India
Bachelor of Business Administration (BBA) with a specialization in **Human Resources (HR)**

12th
Scholars' den school
2023 | Khandwa, India
Percentage: 88% (Commerce)

SKILLS

Technical Skills

Business & Analytics Tools: Power BI, MS Excel, SQL, Data Visualization, Dashboard Creation
Programming & Development: Python, HTML, CSS, JavaScript, React, PHP, API Integration
Business Analysis Knowledge: Basic SDLC Understanding, Requirement Analysis, Agile Concepts, Documentation
Other Tools: Microsoft Office Suite, Digital Marketing, Generative AI Tools

Soft Skills

- Requirement Understanding & Documentation
- Communication & Stakeholder Coordination
- Problem-Solving
- Content creation
- Team Collaboration
- Adaptability

INTERESTS

Technology Trends | Coding and Web Development | Business Strategy and Innovation

PROJECTS

Websites

Created multiple websites including a blogging platform, an e-commerce website, and a gym website, focusing on responsive design and user-friendly interfaces.

Demo Website Project – Gym Website (Sample Project) <https://zippy-cupcake-7d7ed9.netlify.app/> 

Google Takeout Data Analytics Dashboard (Power BI)

Developed an interactive Power BI dashboard by extracting and cleaning user activity data using Google Takeout. Transformed raw logs into structured datasets, identified key KPIs, and generated insights on activity trends and usage patterns to demonstrate data-driven analysis and visualization skills. GitHub Repository: [Link](#) 

AI Voice Agent for Clinics

Built an AI-powered voice agent capable of handling patient calls, collecting basic information, answering common queries, and assisting with appointment booking. Explored AI tools and automation workflows to simulate real clinic call handling and improve operational efficiency.

AI-based Writing Assistant with X-API Integration

Developed a content generation tool that allows users to input a topic or link and choose the tone (e.g., formal, casual, persuasive). The system uses AI to generate tailored content based on the input. (Python, AI, X-API, Javascript)

Ledger – Expense Tracker Web App

Created a responsive expense tracker with income/expense management and real-time balance updates.

VC Intelligence Platform – Web Project

Developed a web-based platform to explore and display venture capital firms and company data in a structured and user-friendly format. Designed a clean interface for browsing startup ecosystem information and deployed the project online using Vercel for easy public access.
